

Disclaimer

This presentation includes forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, which provides a "safe harbor" for such statements in certain circumstances. When used in this presentation, the words "can," "will," "intends," "expects," similar expressions and any other statements that are not historical facts are intended to identify those assertions as forward-looking statements. All statements that address activities, events or developments that Arq, Inc. ("Arq" or the "Company") intend, expect or believe may occur in the future are forward-looking statements. These forward-looking statements may relate to such matters as business strategy, expectations about future demand and pricing for our PAC and GAC products and our ability to enter into new markets, the ability to successfully integrate legacy Arq's business and effectively utilize legacy Arq's products and technology, the estimated costs and timing associated with potential capital improvements at our facilities, financing sources for such projects and potential production outputs thereafter, expected market supply of GAC products and the cost savings and environmental benefits of our GAC products, and the timing and scope of future regulatory developments and the related impact of such on the demand for our products. These forward-looking statements involve risks and uncertainties. Actual events or results could differ materially from those discussed in the forward-looking statements as a result of various factors including, but not limited to: the Company's ability to maintain relationships with customers, suppliers and others with whom it does business and meet supply requirements, or its results of operations and business generally; risks related to diverting management's attention from the Company's ongoing business operations; changes in construction costs or availability of construction materials; our inability to effectively manage construction and startup of the Red River GAC Facility or Corbin Facility; our inability to ramp up our operations to effectively address recent and expected growth in our business; the timing and cost of capital expenditures and the resultant impact to our liquidity and cash flows; our inability to obtain required financing or obtain financing on terms that are favorable to us; the ability to meet Nasdaq's listing standards following the consummation of the Transaction; opportunities for additional sales of our activated carbon products and end-market diversification; the Company's ability to meet customer supply requirements; the rate of coal-fired power generation in the United States; timing and scope of new and pending regulations and any legal challenges to or extensions of compliance dates of them; impact of competition; availability, cost of and demand for alternative energy sources and other technologies; technical, start up and operational difficulties; competition within the industries in which the Company operates; loss of key personnel; ongoing effects of the inflation and macroeconomic uncertainty, including from the ongoing pandemic and armed conflicts around the world, and such uncertainty's effect on market demand and input costs; as well as other factors relating to our business, as described in the Company's filings with the U.S. Securities and Exchange Commission (the "SEC"), with particular emphasis on the risk factor disclosures contained in those filings. You are cautioned not to place undue reliance on the forward-looking statements and to consult filings Arq has made and will make with the SEC for additional discussion concerning risks and uncertainties that may apply to the business and the ownership of Arq securities. The forward-looking statements speak only as to the date of this presentation, and the Company does not undertake any obligation to update its forward-looking statements to reflect events or circumstances that may arise after the date of this presentation.

Non-GAAP Financial Measures

Included in this presentation are certain financial measures that are not calculated in accordance with U.S. generally accepted accounting principles ("GAAP") designed to supplement, and not substitute, the Company's financial information presented in accordance with GAAP. The non-GAAP measures as defined by the Company may not be comparable to similar non-GAAP measures presented by other companies. The presentation of such measures, which may include adjustments to exclude unusual or non-recurring items, should not be construed as an inference that the Company's future results or leverage will be unaffected by other unusual or non-recurring items. Please see the attached appendix for how we define these non-GAAP measures, a discussion of why we believe they are useful to investors, and certain limitations and reconciliations thereof to the most directly comparable GAAP measures.

Company Overview – Who is Arq?

Arq is a diversified, environmental technology company with products that enable a cleaner and safer planet while actively reducing our environmental impact

Produce activated carbon & other environmentally beneficial carbon products

- PFAS remediation
- Soil, water and air purification
- Asphalt additives

Uniquely utilize bituminous coal waste as feedstock

- Reduced emissions
- Improved environmental footprint

Provide innovative environmental solutions for a cleaner future

- Superior products
- Differentiated supply chain
- Portfolio of applications

Arq Investment Highlights

Vertically Integrated

Activated carbon producer with unique patent protected technology, dedicated feedstock, owned & operated production facilities and distribution network

Growth Focused

Shift to underserved and growing markets repositions business for growth through higher margin products

Environmentally Beneficial

Unique production process utilizing waste feedstock reduces CO2e emissions

Competitively Advantaged

Combination of product performance, production cost, environmental benefits and industry-leading R&D team differentiate the business

Undervalued Asset Base

Existing asset base replacement value is multiples of current market capitalization

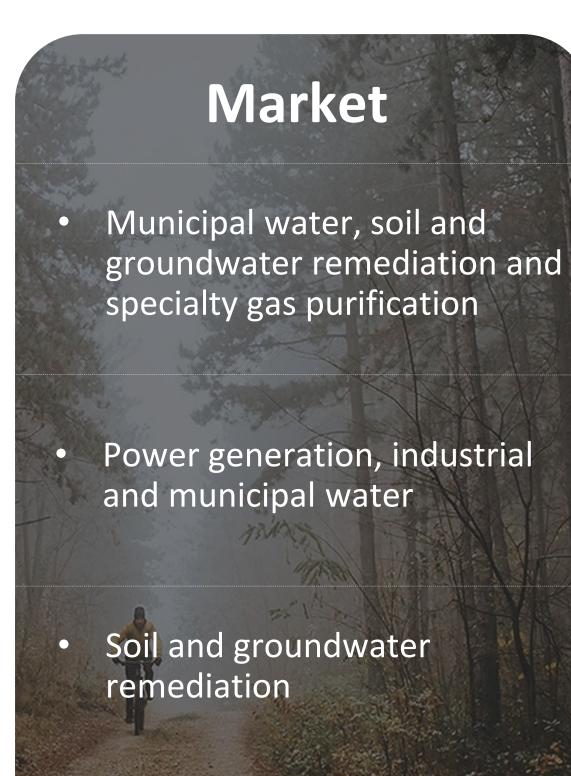

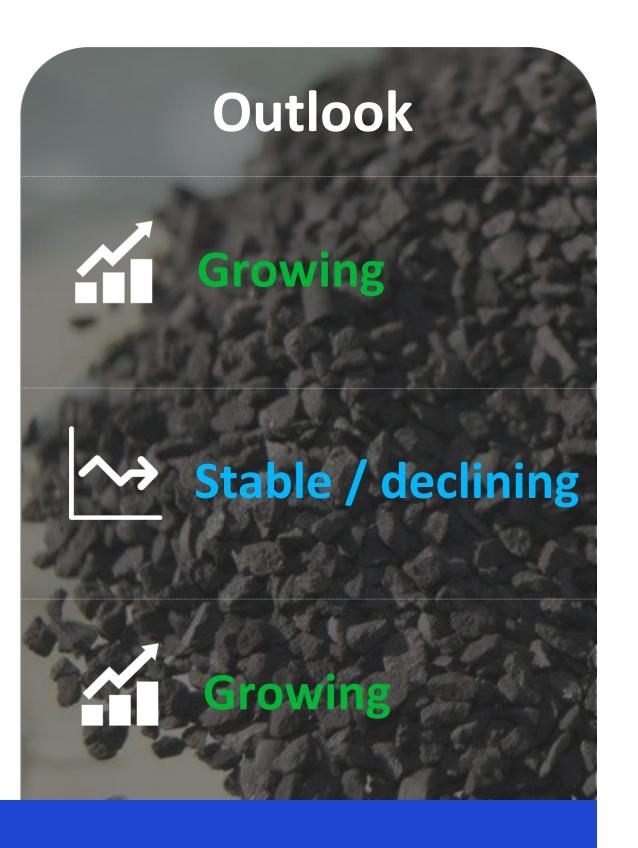

Products and Market Applications

Activated carbons are highly engineered sorbent materials which purify, filter or remove pollutants from air, water and soil

Ongoing R&D addressing potential applications in diverse growing markets including carbon black additives (tires, polymer composites and coatings) and asphalt additives (infrastructure and building)

Rebrand Reflects Transformation to Growth Business

Rebrand to Arq Completed in February 2024

- Reflects transformation from industrial manufacturing company serving declining industries to environmental technology company serving growth markets
- Products addressing growing markets and used to reduce or reverse environmental liabilities like PFAS or "Forever Chemicals"

Powder Activated Carbon (PAC)

- Arq's **foundational** business
- Established leading market position; strong fundamentals for ongoing demand
- Penetrating new markets (e.g. water), driving cost reduction, improving product mix and ASP, and eliminating loss-making relationships
- Achieved positive cash flow in Q4 2023 via focus on profitability over volumes
- Remains key part of our ongoing strategy and business

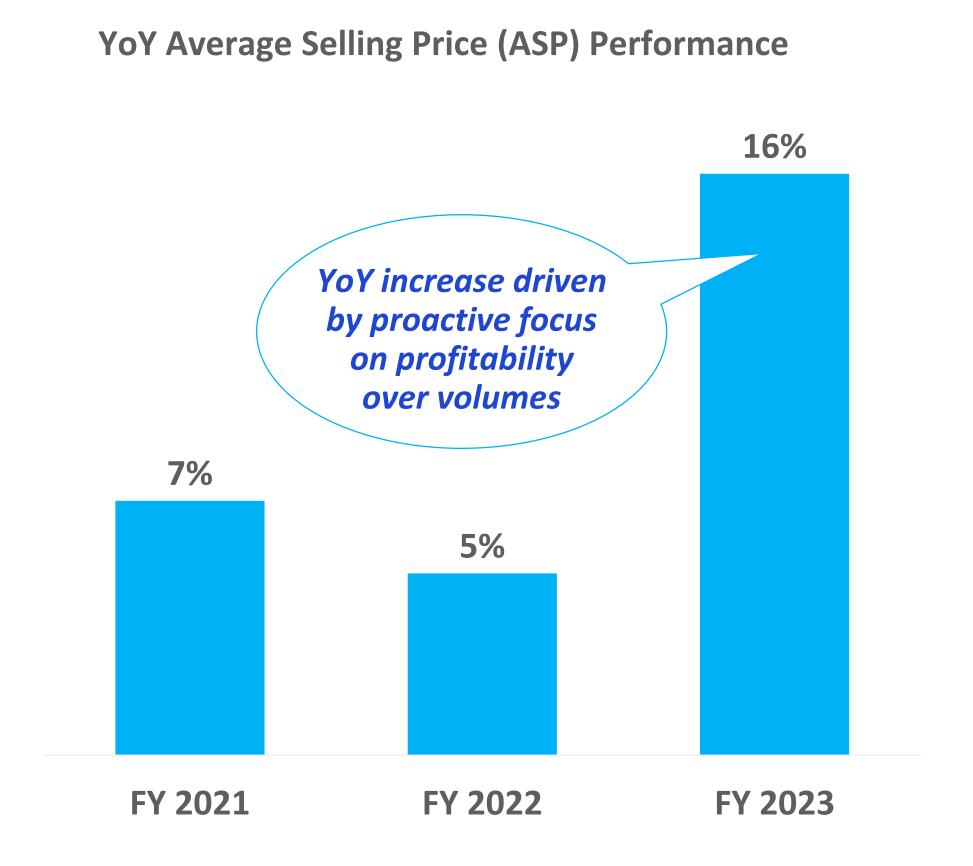

Granular Activated Carbon (GAC)

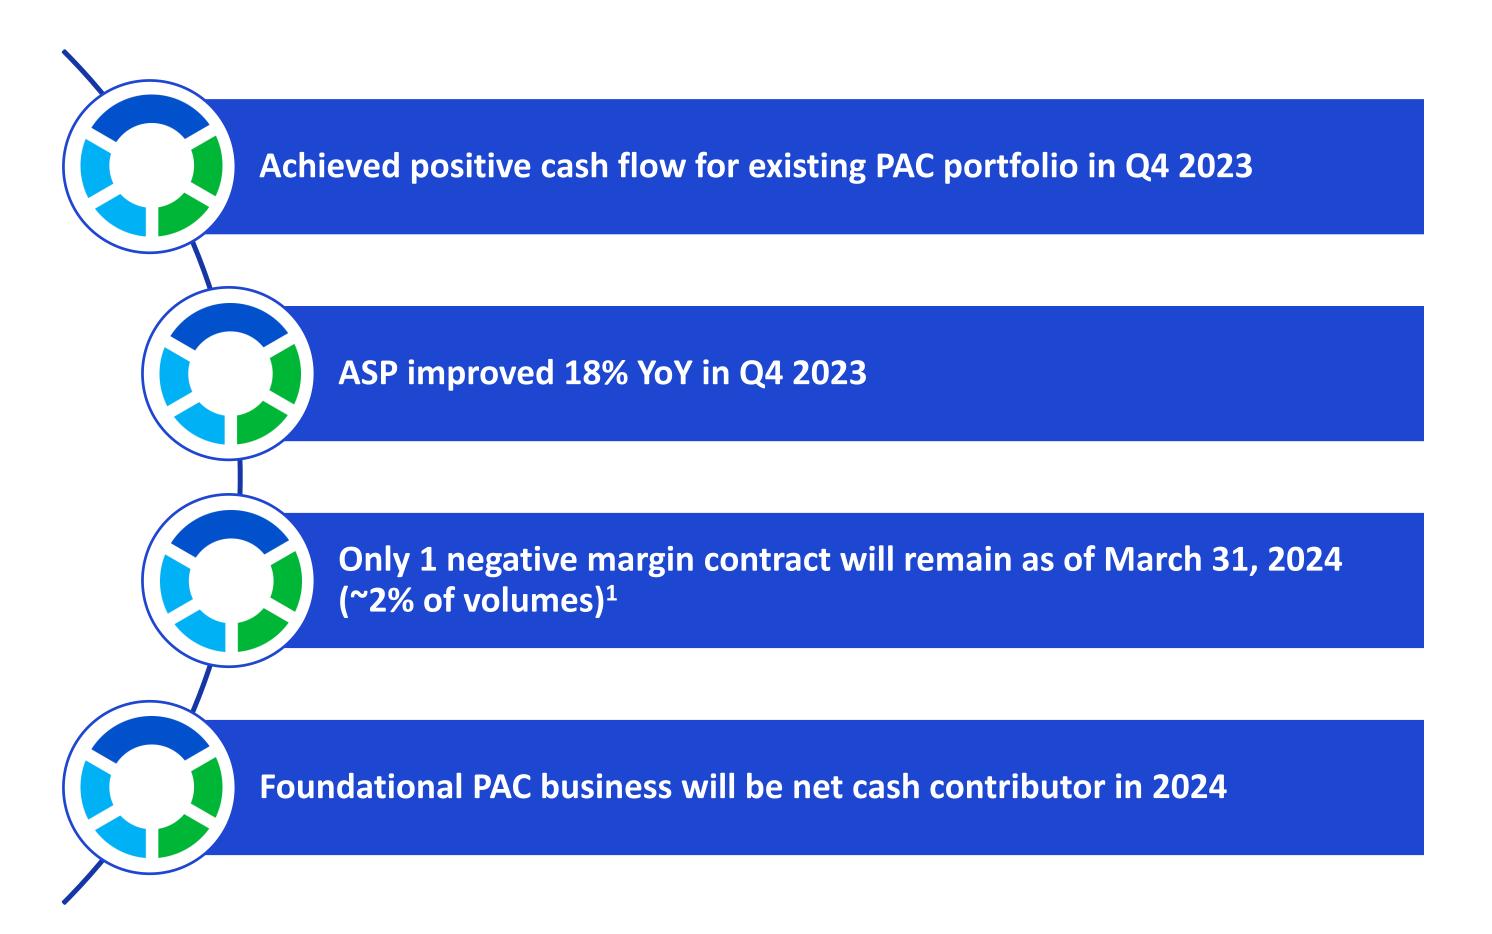

- Arq's growth business
- Highly attractive investment economics on first phase of production
- Unique opportunity to leverage existing asset & portfolio base to drive further differentiation
- Compelling macro tailwinds in the U.S. and globally
- Significant expansion to potential total addressable market

Execution Strategy for Foundational PAC Business

Transformation of PAC business demonstrates successful execution of strategic focus on profitability over volume

7

Recent Financial Highlights – Q4 2023

Key Drivers of Corporate Transformation

What We're Doing

Red River Project

- Expansion to deliver incremental 25 million lbs. of GAC product
- Commissioning expected to conclude in Q4 2024

Corbin Project

- Development remains on time & within budget
- Commissioning expected to conclude in Q2 2024

How We're Going to Do it

\$55-60 Million

(Total Capex 2024)

- Red River: \$45-50 million
- Remainder driven by maintenance capex & Corbin commissioning

Funding Sources

- Cash on hand
- Cash generation in 2024+
- Ongoing cost reduction initiatives
- Potential prepayments on GAC contracts
- Planned borrowing (Term Loan refinancing & potential expansion; no equity issuance)

What it Delivers

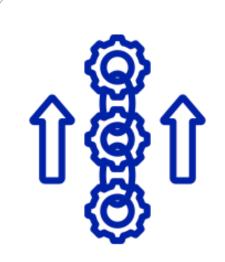

- ✓ Targeted payback of 3 years or less for Red River project
- Expanded products and solutions portfolio
- Expansion into rapidly growing markets
- ✓ Differentiated feedstock source w/ cost & sustainability benefits
- ✓ Generate strong additional GAC cash flow to PAC foundation
- ✓ Continue transformation to environmental tech company

Our Key GAC Differentiators

Arq's unique products, process and supply chain are key differentiators

We will be the only GAC producer:

...with a vertically integrated domestic supply chain...

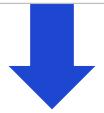

...using bituminous coal waste feedstock, enabling significant environmental benefits...

...and with estimated lower Scope 1 & 2 CO2e emissions (vs virgin coal-based GAC)

- ✓ Arq's own
 bituminous coal
 waste used as
 feedstock supply
- ✓ Drives competitive sourcing vs. traditionally mined coal

✓ Lowers operating costs by generating net positive power

✓ Avoids negative import factors (freight, tariffs and duties)

Strong & Growing GAC Market Drivers

Compelling macro tailwinds driven by potential regulation

- Latest EPA update (Feb 2024) highlighted scope of ambition to specifically reduce PFAS ("Forever Chemicals") in our communities
- Initial proposals expected imminently; should they become formal regulation, will serve as significant catalyst for greater demand of Arq products
- If current proposal enacted, potentially adds 3-4x in demand volume beyond existing ~170 million pound annual municipal water market
- Other jurisdictions, including the EU, expected to pursue similar path, serving as further global macro tailwind

Why this matters...

- Could establish new materially higher standards for drinking water across USA
- Could add multiple PFAS compounds as hazardous constituents

 Could create increased demand for effective remediation products (e.g. GAC), exacerbating shortages of supply

Trend for stricter regulations and constrained supply anticipated to be replicated globally, further increasing product demand

PFAS – "Forever Chemicals" Awareness Gathering Pace

- Per- or poly-fluorinated alkyl substances (PFAS) are a group of industrial chemicals typically used in everyday products to make them non-stick, waterproof or stain resistant
- Often referred to as 'Forever Chemicals' because of their extreme persistence in the environment
- 98% of US population estimated to have some form of negative PFAS exposure*
- High levels of exposure have been linked to cancer, liver and kidney damage**
- In 2023, EPA set new legal limits for PFOS and PFOA of 4 parts per trillion (ppt), the limit of detection for both chemicals
- 4 ppt is approximately equivalent to 4 grains of sand in an Olympicsize swimming pool. This was a reduction from previous advisory health limit of 70 ppt ***

Investors raise pressure over 'forever chemicals' amid growing litigation

Personal injury claims could reach \$66bn in crisis akin to asbestos liabilities

Arq Investment Conclusions

Vertically integrated

Growth focused

Environmentally beneficial

Competitively advantaged

Undervalued asset base

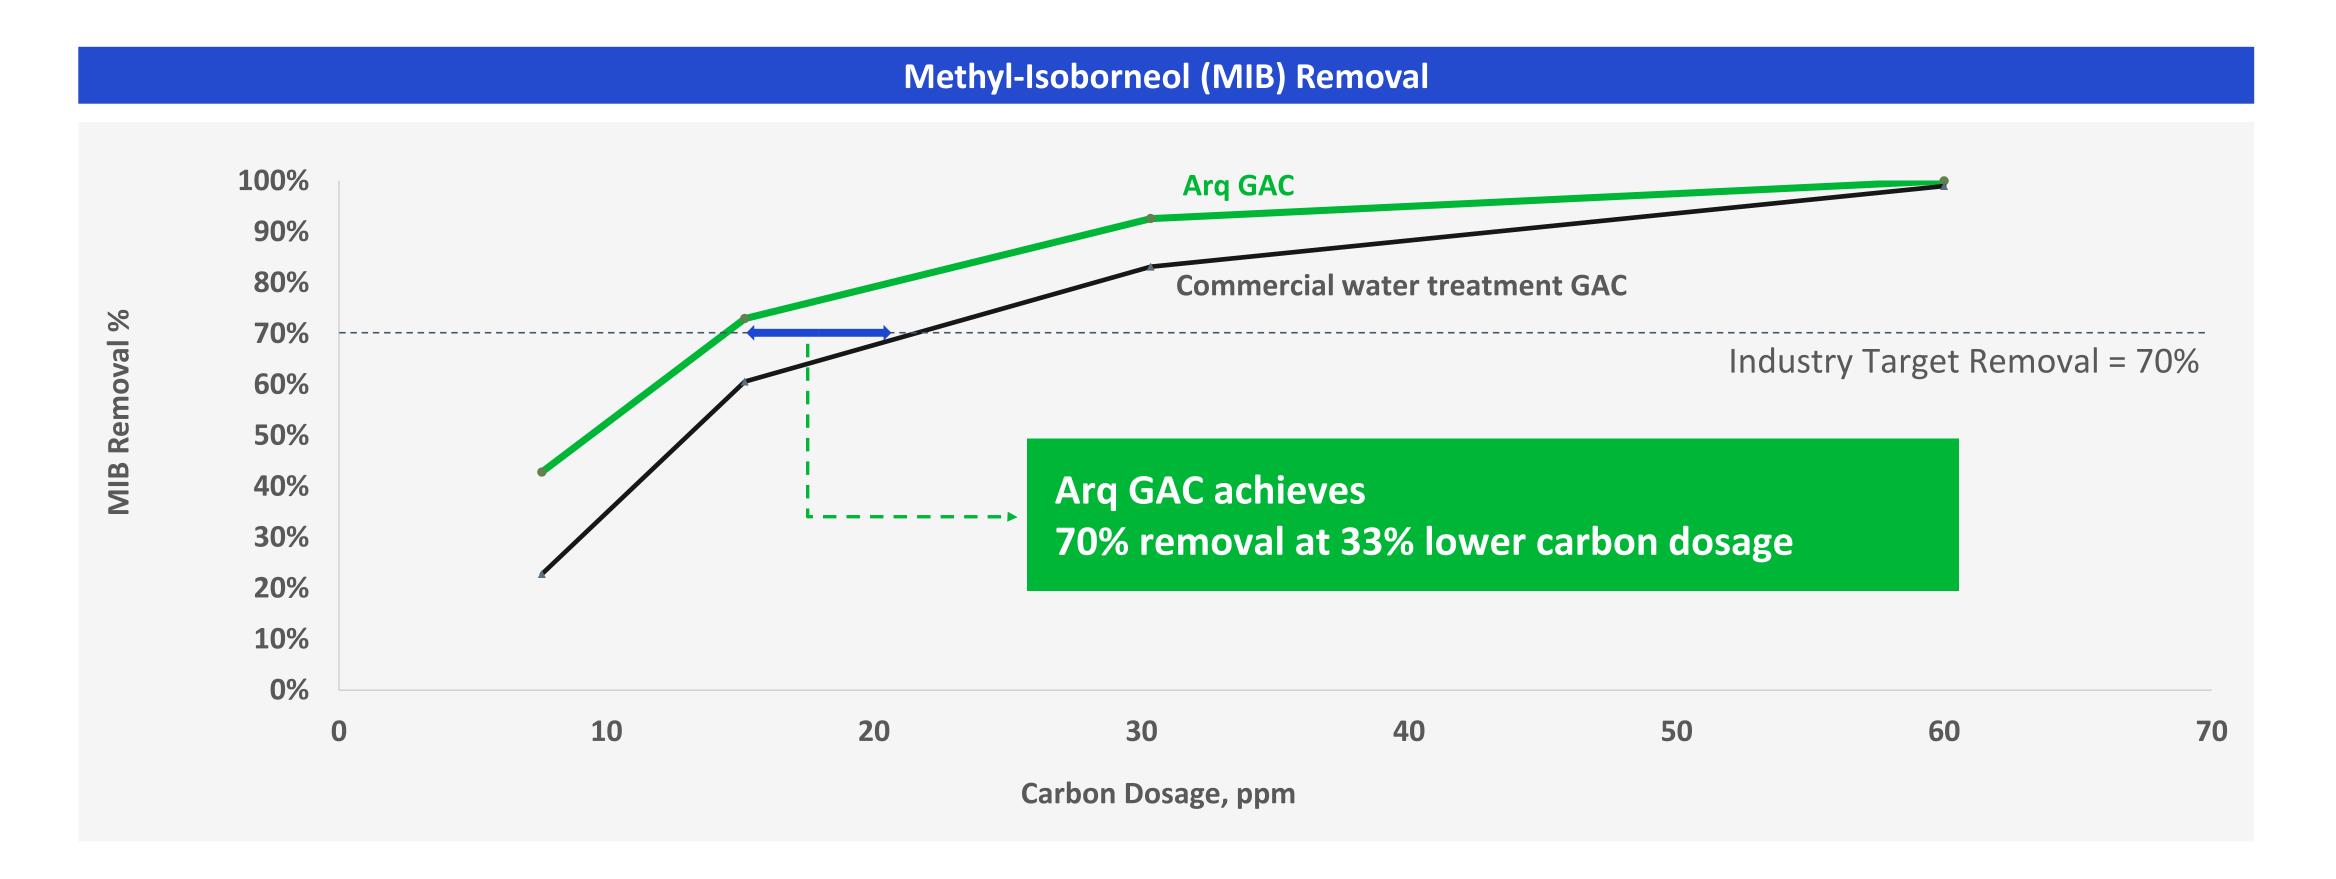

Arq At a Glance

Our Performance Benefits

Municipal water customer testing of our GAC product demonstrates improved performance in water purification for key contaminants

Significant and Undervalued Asset Base

Provides springboard for growth into higher margin products

- Estimated replacement value of existing assets >\$500 million*
- Legacy PAC business provides infrastructure, sales team, customer relationships and market expertise mitigating expansion plan risk
- GAC products carry higher market price points and margins and applications in fastergrowing markets
- Shift toward GAC production from existing facilities and strategic expansion projects increases our market breadth and repositions business for growth

Note on Non-GAAP Financial Measures

To supplement our financial information presented in accordance with accounting principles generally accepted in the United States ("GAAP"), we provide non-GAAP measures of certain financial performance. These non-GAAP measures include EBITDA (EBITDA Loss) and Adjusted EBITDA (Adjusted EBITDA Loss). We have included these non-GAAP measures because management believes that they help to facilitate period to period comparisons of our operating results and provide useful information to both management and users of the financial statements by excluding certain expenses, gains and losses which can vary widely across different industries or among companies within the same industry and may not be indicative of core operating results and business outlook. Management uses these non-GAAP measures in evaluating the performance of our business.

These non-GAAP measures are not in accordance with, or an alternative to, measures prepared in accordance with GAAP and may be different from, and may not be comparable to, similarly titled non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. These measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures.

We define EBITDA (EBITDA Loss) as net income (loss) adjusted for the impact of the following items that are either non-cash or that we do not consider representative of our ongoing operating performance: depreciation, amortization, depletion, accretion, amortization of upfront customer consideration that was recorded as a component of the Marshall Mine, LLC Acquisition ("Upfront Customer Consideration"), interest expense, net and income tax expense. We define Adjusted EBITDA (Adjusted EBITDA Loss) as EBITDA (EBITDA Loss), reduced by the non-cash impact of equity earnings from equity method investments and other infrequent or unusual non-cash gains or losses, and increased by cash distributions from equity method investments. Because Adjusted EBITDA (Adjusted EBITDA Loss) omits certain non-cash items, we believe that the measure is less susceptible to variances that affect our operating performance.

When used in conjunction with GAAP financial measures, we believe these non-GAAP measures are supplemental measures of operating performance which explain our operating performance for our period to period comparisons and against our competitors' performance. Generally, we believe these non-GAAP measures are less susceptible to variances that affect our operating performance results.

We expect the adjustments to EBITDA (EBITDA Loss) and Adjusted EBITDA (Adjusted EBITDA Loss) in future periods will be generally similar. These non-GAAP measures have limitations as analytical tools and should not be considered in isolation or as a substitute for analyzing our results as reported under GAAP.
